

S.No	ANALYSIS	
1	Failure Identification	Inner Race
2	Root Cause	<ul style="list-style-type: none"> • Material Defects • Inadequate or improper lubrication • Pressure Plate
3	Counter Measures	<ul style="list-style-type: none"> • Improved Lubrication Practices • Material Quality Assurance • Environmental Control Measures • Dynamic Balancing
4	Co-Related Systems	<ul style="list-style-type: none"> • Engine Mounts • Breaking Systems • Driveline Components • Crankshaft and Camshaft
5	Recommendations	<ul style="list-style-type: none"> • Regular Retorquing of Fasteners • Load Capacity Matching • Resonance Analysis • Dynamic Suspension
